

---

At Revolve Wealth Partners (Revolve), we value your privacy and take seriously our obligation to use and protect your personal information in accordance with applicable laws and regulations, whether you are a prospective client or a client.

Specifically, as a registered investment adviser, we are subject to certain privacy rules promulgated pursuant to the Gramm-Leach-Bliley Act. These rules are highlighted in our Privacy Policy Notice which require Revolve to keep your personal information private.

Accordingly, Revolve agrees not to intentionally share personal information of clients or prospective clients with third parties except for our own business purposes, such as processing your transactions, maintaining your accounts or for our own marketing purposes. Revolve has advised all of its employees who are given access to personal information of prospective clients and clients of the requirements and provisions of this document and of our Privacy Policy Notice.

Please find our Privacy Policy Notice enclosed with this letter. We encourage you to review this notice closely and let us know if you have any questions.

Sincerely,

Michael Israel & Daniel Katz  
Managing Partners

<b>Joint marketing</b>	<p>A formal agreement between nonaffiliated financial companies that together market financial products or service to you.</p> <ul style="list-style-type: none"> <li>▪ <i>We do not jointly market.</i></li> </ul>

# Safe & Secure

Your wealth management system employs advanced security features and protocols to keep your data safe, private, and secure at every hour of every day, year round.

Our comprehensive security measures include password protection, Secure Socket Layer encryption, firewalls, intrusion detection, audits, inspections, and more.

With each measure in place, you can be confident that your important information is safe and secure.

### PASSWORD PROTECTION

You have a unique username and password, ensuring that only you can access your information. Submitting incorrect login credentials three consecutive times will automatically lock your account for 10 minutes. This is to block any manual or programmed hacking attempts.

In most cases, we have no access to your username or password. However, if you decide to provide us with this information, we will never share your username and password over the phone or send it to an email address not pre-registered with your account.

### HIGHEST ENCRYPTION

Our system uses a 256-bit Secure Socket Layer to scramble your data, further preventing access to unauthorized users. This is the highest level of encryption currently available today, and twice the standard followed by many financial institutions, including banks.

### SECURED DATA

We house your important data at secure, geographically separated data centers. Physical security measures at these facilities includes 24/x7/x365 on-site personnel and closed circuit video surveillance.

These data centers also make use of fire protection, electronic shielding, and database backup procedures to ensure your data is continuously monitored and protected.

### ROUTINE SECURITY TESTING

Your wealth management system uses third-party security auditors and software, including TraceSecurity, Tenable Security and WhiteHat Security, to identify vulnerabilities within your system and to assist us with remediation efforts.

### 2-FACTOR AUTHENTICATION

Your wealth management system employs 2-Factor Authentication (2FA), a complete fraud detection platform that uses a dynamic risk- and rules-based approach to identify high-risk behaviors and initiate an additional layer of security. With 2FA, you are sent a verification code to your mobile phone, which you are required to input along with your username and password in order to access your personal financial website. This additional layer of protection safeguards your sensitive financial data and strengthens the security of your account by requiring two methods of verifying your identity.

### NON-TRANSACTIONAL

Unlike online banking, trading or shopping websites, your money cannot be moved, withdrawn or accessed on our system.
